

Chat Widget Addon

Documentation

Item Name: Chat Widget Addon

Version: V1.0.0

Requirements:

1. [SaleBot - WhatsApp And Telegram Marketing SaaS - ChatBot & Bulk Sender](#) Must be preinstalled on your server.
2. Required SaleBot Version: V1.8.0 or Later.
3. Imagick extension enabled on your server.

Installation:

Step 1: Purchase and Download

1. Visit the [CodeCanyon ChatWidget](#) page.
2. Purchase the **ChatWidget addon**.
3. Download the **ChatWidget** package from your **CodeCanyon** account.

Step 2: Upload and Activate Addon

1. Log in to your **SaleBot** admin panel.
2. Navigate to the **Addon** menu.
3. Select **Installed Addons**.
4. Click the **Upload** button.
5. In the modal that appears:
 - Enter the activation code provided at the time of purchase.
 - Upload the **ChatWidget.zip** file.
 - Click **Save** to complete the installation.
6. Once uploaded, the addon will be activated and ready for configuration.

After the installation, the ChatWidget menu will be visible in the client panel under **WhatsApp -> Chat Widget**.

Usage

Creating and Customizing a Chat Widget

1. Navigate to the Chat Widget Section:
 - Go to **WhatsApp -> Chat Widget** in the client panel.
2. **Add a New Chat Widget:**
 - Click the **Add New** button to create a new chat widget.
3. Customize Your Chat Widget:
 - **Chat Widget Design:**
 - Enable or disable the chat box.
 - Choose the box position: middle-left, middle-right, bottom-left, or bottom-right.
 - Select the layout: button or bubble.

- Enable or disable rounded borders.
- Set the button text.
- **Availability :**
 - Configure available days.
 - Set the time zone.
- **Messages :**
 - Set the initial message displayed to users.
- **Bot:**
 - Enable or disable bot auto open.
 - Set the auto open delay.
- **Header :**
 - Customize the header title.
 - Set the header subtitle.
- **Appearance:**
 - Choose background color.
 - Set header background color.
 - Customize text color.
 - Set contact label color.
 - Choose name color.
 - Set body font size.
 - Customize button icon color.
 - Select the font family.

4. Add Contacts to the Widget:

- Add contacts by filling in the required details like name, phone, and label.

Embedding the Chat Widget

1. Get Embed Code:

- In the list of chat widgets, find the widget you want to embed.
- Under the action column, click the **Get Embed Code** </> button.

2. A popup will appear with the embed code.

3. Copy and Paste the Embed Code:

- Copy the embed code from the popup.
- Paste this code into the BODY of any website where you want the chat widget to appear.

Example: If you want to add the chat widget to your SaleBot script frontend, follow these steps:

1. Copy the chat widget embed code.
2. Go to **Admin Panel -> Website Settings -> All Settings -> Custom JS.**
3. Paste the chat widget embed code into the **Footer Script** field.
4. Save the settings and visit the homepage to see the chat widget in action.

4. Share Contacts QR Code:

- In the same embed code popup, you can also get a QR code to share the contacts.

Customization Options

- ChatWidget offers extensive customization options to match the look and feel of your web application.

Common Issues

- **ChatWidget not displaying:** Ensure that all installation steps are completed and that your SaleBot version meets the required version.
- **Appearance issues:** Check your customization settings for any conflicting styles.

Changelog

Version 1.0.0

- Initial release with core features
- Customizable interface
